## Washington Palustrine and Estuarine Wetland Estimates by Land Cover/Use

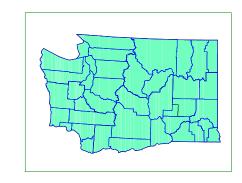

Washington State 1997 Palustrine and Estuarine Estimates		
Land Cover / Use	Acres	Percent
Cropland, Pastureland and CRP land	286,300	29.8%
Rangeland	65,000	6.8%
Forestland	420,400	43.7%
Other Rural Land	155,700	16.2%
Water Areas	15,700	1.6%
Developed Land	18,000	1.9%
TOTAL ACRES	961,000	100.0%

Total estimates may be adjusted to account for rounding.

NRI data is not collected for any year that the land is in Federal ownership.

National Resource Inventory (NRI) results indicate that almost half of Washington State palustrine and estuarine wetlands occur on forestlands.

Nearly one third of the Palustrine and Estuarine wetlands occur on cropland, pastureland and Conservation Reserve Program (CRP) lands.
